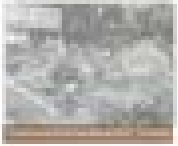
Scientific Attractions Enrich Royal Weekend

Interactive Centres in the UK

1 **All Hands Gallery**
London
2 **Archaeological Resource Centre**
York
3 **Armagh Planetarium**
Northern Ireland
4 **Buxton Micrarium**
Buxton
5 **Catalyst**
Widnes
6 **Centre for Alternative Technology**
Wales
7 **Curiosity**
Oxford
8 **Discovery**
Weymouth
9 **The Discovery Centre**
London
10 **Discovery Domes**
London
11 **Earthquest**
Northern Ireland
12 **Elsecar Heritage Centre**
Barnsley
13 **Eureka!**
Halifax
14 **The Exploratory**
Bristol
15 **Explore It**
Northern Ireland
16 **Foredown Tower**
East Sussex

17 **Green's Mill and Centre**
Nottingham
18 **Herstmonceux Science Centre**
East Sussex
19 **Inspire**
Norwich
20 **Intech**
Winchester
21 **Jodrell Bank Science Centre**
Cheshire
22 **Kaleidoscope**
Milford Haven

23 **Launch Pad** and **Flight Lab**
London
24 **Light on Science**
Birmingham
25 **National Stone Centre**
Derbyshire
26 **Satrosphere**
Aberdeen
27 **Science Factory**
Newcastle
28 **Science for Life**
London
29 **Scope**
Sheffield
30 **Search**
Hants
31 **Sellafield Visitor Centre**
Cumbria
32 **Ship Shape**
Liverpool
33 **Snibston Discovery Park**
Leics
34 **Techniquest**
Cardiff
35 **Xperiment!**
Manchester



An international space week is planned to celebrate October 4th, 5th and 6th, the anniversaries of the launching of the world's first artificial satellite and the first manned space flight. The activities planned are intended to interest the people more in the exciting developments. This year sees the inauguration of the Apollo programme, the Mars Mariner probes and the first orbital flight of Gemini.

BBC Enterprises announced today that there will be many special space events and broadcasts during the week. Among the programmes will be a live broadcast from the Kennedy Space Centre, Florida, of the launching of the first Apollo spacecraft. Other programmes will include a special edition of Tomorrow's World, a documentary on Russia's space programme, and a programme on the work of the Jodrell Bank radio telescope.

BBC Enterprises is also planning a special exhibition at the Science Museum, South Kensington, London, which will open on October 1st and run for a week. The exhibition will feature models of the Apollo spacecraft and the Saturn rocket which will launch it, and will also include a display showing how a manned spacecraft will be launched and recovered.

Space Week will also be celebrated in the USSR. Yesterday in the Kremlin, Mr Khrushchev, Chairman of Soviet Ministers, announced that Soviet and American space scientists will meet in Moscow next month to discuss co-operation in space research. The announcement was made at a banquet given in honour of Mr Leonid Brezhnev, Soviet Communist Party leader, who is visiting Britain.

Mr Khrushchev said that the Soviet Union was ready to co-operate with the United States in the exploration of outer space for peaceful purposes. He suggested that the two countries should co-ordinate their space programmes, jointly launch some unmanned research rockets, and exchange research results.

BBC Enterprises announced a "Space Celebration" week starting tomorrow (Sunday) in Hall 8 at Wembley Conference Centre. It is organized by the British Interplanetary Society in conjunction with the Conference. Prof. A. V. Cleaver, Director, National Science Museum, will open the exhibition. Other events include a lecture by Dr. Arthur C. Clarke, Chairman of the British Interplanetary Society, on "Space Exploration". The exhibition will run from Sept. 27 to Oct. 3.
